**Subject:** Welcome to the first day of the 2017 GlobalChem Conference!

## Good morning and welcome to the first day of the 2017 GlobalChem Conference and Exhibition!

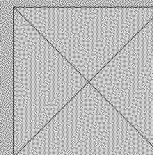

As the business of chemistry's premier policy and regulatory conference, GlobalChem offers a valuable opportunity for industry leaders, regulators and stakeholders to review key developments in the global chemicals management arena. A primary focus of this year's GlobalChem conference will be implementation of the watershed Lautenberg Chemical Safety for the 21st Century Act (LCSA), providing industry an unprecedented forum to help shape chemical policy that will affect the industry for years to come.

Before getting into the details of the day ahead, we would like to recognize the principal sponsors of this year's conference, **Beveridge & Diamond PC** and **Step toe & Johnson LLP**. We would also like to remind everyone that schedules, session descriptions, speaker information, exhibitor details and hotel information are available on the GlobalChem website, <http://www.globalchem.org/>, and on the Conference App, which can be downloaded [here](#).

Today's pre-conference workshop will be particularly focused on the LCSA. All sessions will be in the **Palladian Ballroom**. Highlights include:

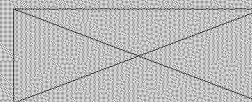

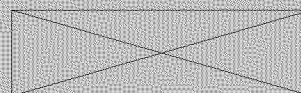

- **Impact of Lautenberg CSA on TSCA Basics**  
**8:00 am – 9:30 am**  
This session will explore how certain programs under TSCA will be impacted by the recently passed LCSA. It will provide an overview of what has and has not changed in TSCA, as well as discuss what is expected with EPA's newly proposed regulations to implement the LCSA.
- **LCSA and New Chemicals Program**  
**9:45 am – 11:00 am**  
Take a deeper dive into the new LCSA and the New Chemicals Program. Panelists will discuss the EPA's approach to new chemicals under the LCSA, including the changing implementation of the PMN program.
- **21st Century Risk Assessment**  
**11:15 am – 12:15 pm**  
This session will focus on incorporating new innovations in risk

Principal Sponsors:

### Did you know?

Today's Workshop is in the OMNI's Palladian Room, which has a mural depicting the life of Thomas Jefferson. The red bunting (ribbon) in the mural was how you would find the way to a party during the era since navigation was not available. Can you find Jefferson and his dog on the

assessment in tiered chemical toxicity determinations and exposure assessment for risk based priority setting, screening and safety assessment.

wall?

The pre-workshop day will feature internationally-focused sessions all afternoon. Also in the **Palladian Ballroom**, these globally-focused sessions will include:

- **EU REACH: 2018 Deadline and REACH Review**  
**1:30 pm – 2:30 pm**  
Learn more about what will the REACH 2018 deadline will entail for registrants and the impact of data sharing and SIEFs. This session will also explore how EU REACH is undergoing a review of implementation throughout 2017, which serves as an opportunity for industry to raise concerns about the program's impact on the industry.
- **Korea REACH, China New Chemical Notification and Taiwan TCSCA Implementation**  
**2:30 pm – 3:30 pm**  
Hear from a Korean expert on what to expect for the first significant registration deadline, in 2018. This session will also highlight changes to China's New Chemical Notification regulation based on revisions through stakeholder consultation periods in 2015 and 2016. This session will also feature a focus on implementation of Taiwan's Toxic Chemical Substances Control Act, highlighting lessons learned since implementation began in 2015.
- **GHS Fundamentals**  
**3:45 pm – 4:30 pm**  
Hear from OSHA on developments in GHS Implementation in the U.S. as well as their plans for future work. Additionally, there continues to be major differences between countries in the way the GHS is being implemented. Learn how the U.S. and Canada have been working together to align GHS Regulations, which could serve as a model for other countries.
- **Navigating International Chemical Regulations**  
**4:30 pm – 5:15 pm**  
With an uptick in chemical control regulations around the world, this session will cover the fundamentals of complying with international regulations. And, learn more about ACC's NEW Center for Chemical Safety Act Implementation, as a means to proactively address new LCSCA requirements.

**Don't forget, the GlobalChem Exhibition Grand Opening and Welcome Reception starts at 5:30 pm in the Regency Ballroom!**
